SUMMARY

Software Engineer with 5+ years building and running production web platforms in fintech and event management. Builds APIs and event-driven systems in Node.js, TypeScript and NestJS on Kafka, PostgreSQL and Redis, with React and Next.js frontends, on AWS and Azure. Owns products end to end and brings AI into real workflows with n8n, MCP servers and LLM integrations. Fluent in Arabic and English.

EXPERIENCE

Senior Software Engineer, 7 Pulse Events | 02/2024 – Present | Dubai, UAE

- Delivered a company-wide event management platform by building and owning its backend services, internal dashboard, public websites and AWS infrastructure end to end.
- Sped up API responses by building REST APIs with Node.js, TypeScript and NestJS, adding Redis caching, fixing N+1 queries and tuning PostgreSQL and MongoDB indexes.
- Replaced manual event operations by building an internal dashboard and CRM in React and Next.js for inventory, planning and leads.
- Kept production highly available by running AWS infrastructure on Docker, EC2, S3, CloudFront, RDS and SNS.
- Cut repetitive manual work by building AI agent workflows in n8n wired into the dashboard.

Software Engineer, AlphaForge Labs DMCC | 02/2022 – 02/2024 | Dubai, UAE

- Delivered a bespoke white-label trading platform to multiple clients by owning products end to end, from requirements and architecture to delegation, deployment and monitoring.
- Enabled live trading at scale by building high-performance market data and order execution services in Node.js and TypeScript and integrating third-party brokers.
- Gave traders real-time market views by building React and Next.js trading screens that stream prices over WebSockets into live charts.
- Enabled real-time data flow between trading services by building distributed, event-driven microservices on Apache Kafka and RabbitMQ, exposed through secure REST and GraphQL APIs.
- Shipped reliably to production by deploying containerized services to AWS and Azure with Docker and Kubernetes, working with DevOps on Jenkins CI/CD pipelines and monitoring.

Software Engineer, Shadil Trading Est. | 07/2021 – 01/2022 | Sharjah, UAE

- Supported ERP inventory, orders and invoicing by building backend APIs with Node.js and Express.js.
- Sped up reports and page loads by tuning PostgreSQL queries and schemas.

Software Engineer Intern, Sharjah Sports Council | 01/2021 – 04/2021 | Sharjah, UAE

- Shipped full stack features by building them with React and Node.js and testing them before release.

SKILLS

Languages: TypeScript, JavaScript (ES6+), SQL, Python, Java

Backend: Node.js, NestJS, Express.js, REST, GraphQL, WebSockets, microservices, Kafka, RabbitMQ

Databases: PostgreSQL, Redis, MongoDB, MySQL, DynamoDB; schema design, query optimization, caching

Cloud & Infrastructure: Kubernetes, Docker, AWS (EC2, S3, CloudFront, RDS, SNS), Azure, GCP, Terraform, CI/CD, Jenkins, Git, Linux, Bash, SSH

AI & Automation: n8n agents, MCP servers, LLM integrations, AI coding agents, agentic workflows

Frontend: React, Next.js, Vue.js, Nuxt, Tailwind CSS, Redux, Zustand, TanStack Query

Practices: Jest, Cypress, Playwright, Agile, Jira, code review, mentorship

EDUCATION

BSc IT Networking & Security, Ajman University | 01/2017 – 01/2021 | Ajman, UAE
